

PRIYANSHU HARSANA

AI & ML Engineer

+91 7827675169 • pransuharsana@gmail.com • West Delhi, India

[LinkedIn](#) | [GitHub](#) | [HackerRank](#)

PROFESSIONAL SUMMARY

AI/ML Engineer with 3+ years of experience building and deploying production-grade Machine Learning, Generative AI, and Python-based solutions across the full ML lifecycle—from ETL and feature engineering to model training, LLM applications, multimodal RAG, MLOps, deployment, and monitoring. Skilled in Python, FastAPI, PostgreSQL (pgvector), LangChain, and cloud-ready AI systems. Currently completing an MBA in Artificial Intelligence & Machine Learning, combining strong technical expertise with business strategy. **Expert in RAG pipelines, embeddings, vector databases, and prompt engineering**, with experience in AWS/Azure/GCP, Docker, CI/CD, and model evaluation. **Proven track record in developing scalable AI components and automating experimentation workflows.**

TECHNICAL SKILLS

Generative AI & LLMs: LLMs, RAG, LangChain, LangGraph, Prompt Engineering

Data Engineering & Cloud: Python, SQL, Apache Spark (PySpark), Pandas, NumPy, ETL/ELT Pipelines, PostgreSQL (pgvector), BigQuery, AWS SageMaker, GCP, Azure

MLOps & DevOps: MLflow, Docker, Git, GitHub Actions, CI/CD, Model/Prompt Versioning

Vector Search & Embeddings: Embeddings, BM25, MMR, Cross-Encoder Reranking, RRF, Ragas

AI Model & API Integration: FastAPI, OpenAI-compatible APIs, vLLM, llama.cpp

Machine Learning: Scikit-learn, TensorFlow, PyTorch

Data Visualization: Matplotlib, Seaborn, Power BI, Looker Studio, Excel

PROFESSIONAL EXPERIENCE

AI/ML Engineer | Easy Build – Kanodia Group, Noida

Apr 2024 – May 2026

OmniParse-RAG — Multimodal RAG System | [Live Demo](#) | [GitHub](#)

- Built a Retrieval-Augmented Generation (RAG) system to solve **extracting knowledge from .pdf, .excel, .ppt and diagrams in enterprise documents**, by **PostgreSQL (pgvector) with OpenAI-compatible LLMs**. Deployed on using , achieving **hybrid-retrieval RAG application..**
- Built an end-to-end **sales forecasting system on 3 years of historical data and 22 engineered features**; benchmarked multiple regression models and reduced MAE from 120K to 37K using **Gradient Boosting**, enabling more reliable **data-driven sales planning**.
- Designed end-to-end **ETL/ELT pipelines using Python, Transformers, Unstructured, and NLP techniques**, converting raw multi-source data into analytics-ready formats and reducing manual reporting overhead.
- **Applied anomaly detection and statistical validation using Pandas and NumPy** across sales and operational datasets, improving data reliability and confidence in downstream model inputs.
- Automated business workflows using **Python, FastAPI, and LangChain** pipelines across **CRM, Accounts, and Tech functions**, reducing manual effort and improving **operational efficiency**.

Data & MIS Analyst | Giffy Info Tech, New Delhi

Mar 2023 – Apr 2024

- Designed and developed **RESTful APIs using FastAPI and Python** to manage order and vendor data workflows, improving integration between **internal systems and data processing speed**.
- Built interactive **Power BI and Google Sheets** dashboards tracking order volumes, NDR rates, and turnaround times, improving operational visibility and enabling **real-time decision-making**.
- Performed large-scale data manipulation, transformation, and feature engineering using Pandas, NumPy, and advanced Python data-processing techniques to clean, merge, and analyze millions of records, improving data quality and enabling reliable business reporting and analytics..

EDUCATION

MBA – Artificial Intelligence & Machine Learning | DPU, Pune | 2024 – 2026

Focus: AI, ML, Deep Learning, Generative AI, Business Analytics, AI Strategy

Capstone: AI Benchmark Framework — Open-Source vs. Closed-Source LLM Evaluation | [GitHub](#)

- Built a Python benchmarking framework evaluating 6 LLMs (GPT-5, Claude Opus, Gemini Pro, Llama, Qwen, Mistral) across 8 weighted dimensions including intelligence, cost efficiency, and security.

- Modeled Total Cost of Ownership across usage tiers to identify the open-source break-even point at enterprise scale; automated the pipeline from dataset generation to Excel reports and visual analytics.

B.Sc. Mathematics & Computer Science | University of Delhi | 2019 – 2022

Focus: Mathematics, Python, Statistics, Programming, Algorithms, Computational Problem-Solving

Commerce with Mathematics | St. Mary's Senior Secondary School, West Delhi | 2017 – 2019
